# Politicians' Handbook

*Hello and welcome to this guide on how to succeed in political life.*

## Introduction

We as politicians greatly value the opportunity to serve the public as their representatives. It is indeed a great honour. But as we all know political life is not a bed of roses; it is a tough career full of ups and downs, victories and defeats; But in the end it is all worth it, because there's nothing in this world like grasping and holding onto the reins of power for personal satisfaction.

There are a lot of misconceptions about what makes a great politician. Most believe that it takes courage, resolve, tenacity, compassion, intelligence and an innate understanding of the human condition in order to lead in public life. Obviously this is the impression you need to give in public but behind closed doors it's a different game entirely.

The reality in politics is that everyone is out to get you. It may sound paranoid, but it is true; Whether it's party colleagues, opposition or even disgruntled civil servants: All are ready to stab you in the eye at the drop of a hat; Ironically this is what unites us all too- Our collective fear of being annihilated at any moment. It is both a precarious and thrilling existence. If you know how to master the Art Of Politics then you can not only survive but thrive; At least until they inevitably hunt you down

like a dog.

The Art Of Politics isn't a new thing; It's been around since someone decided to bully others into submission and persuade those of like mind to join in the fun. History is chock full of kings queens lords and ladies; People who knew how to persuade, convince or otherwise cajole others into serfdom. Call it statesmanship diplomacy or whatever you like, but politics mostly involves manipulation, bribery and sometimes good old fashioned violence.

Some people would say that this is all a bad thing. Why would we want some people to call the shots while others must fall into line? The answer is simple: They love it; People want others to make their decisions for them, as long as each of them gets similar rewards- Like a house and a car and the ability to go on holidays with one's family.

So without further ado, let's crack on..
